

ALBERT GARCÍA RODRÍGUEZ

FULL STACK
WEB DEVELOPER

/ ALL ABOUT ME

I am a Full Stack web developer focused on the MERN Stack with a background in tv and audiovisuals.

I love absorbing new technologies and information to make them easy to access and understand.

With a keen eye for a good-looking design, I'm a firm believer that knowledge should be easy to access and navigate.

/ WORK EXPERIENCE

<< Junior Front End Developer />>

< Laboratorios Echevarne | 2020 to present />

Worked as part of the team developing the new page for the private client side of the business. Designed as a PWA with React and Redux, with high component reusability in mind for other company projects.

Built with Material UI for better integration with react, designing custom components, and integrating Sass for fine design tuning.

Closely working with the backend team, helped shape the new API with Mockoon creating a Swagger description.

Prototyped and coded three web apps to help speed internal procedures for:

- Fast input and validation of large formularies
- Two-step authentication for a single-time read of COVID test result
- Nationwide centralized reservation system.

Built to be responsive in all screen formats and devices, lightweight, and independent. Designed with SOLID principles in mind and under Agile methods to track progress, version control with Git, and project management with Jira.

<< Tv Technical Director & Studio Operator />>

< Westminster Studios | 2016 to 2019 | London />

For extra info check my LinkedIn profile.

/ EDUCATION HISTORY

<< MERN Coding Bootcamp />>

< Ubiquim Code Academy | 2019 - 2020 />

3 months intensive coding bootcamp focused on JavaScript, the MERN stack, Vue and other industry standard technologies like API Rest, Bootstrap, Agile methodology or Kanban boards.

<< Graduate in Audiovisual Media />>

< Tecocampus Mataró />
